

Environmental Policy

Isuzu Motors has set out a policy to promote environment conservation activities in our business. Under this policy, we have developed a variety of environmental activities.

Basic Philosophy

At Isuzu Motors Co., (Thailand) Ltd., we believe that conservation of the global environment is the most important challenge we face. As professionals in the CV, LCV and diesel engine industry, we aim to contribute to the realization of a sustainable society by providing better products and services, and to pursue compatibility between conservation of the global environment and our business activities in our business.

Action Guidelines

1. We will enhance activities to be consistent with Isuzu Environmental Vision 2050 and roadmap towards carbon neutrality.
2. We will implement proactive and continual improvements to our environmental management system.
3. We will control our environmental impact in our business and to prevent pollution and protect the environment.
 - 3.1 We will control use of energy, our emissions of greenhouse gases and to promote the use of alternative energy.
 - 3.2 We will limit our use and emissions of harmful chemical substances.
 - 3.3 We will promote resource savings and the 5Rs of waste (Reduce, Reuse, Repair, Recycle, Recovery).
 - 3.4 We will promote waste management and reduce waste to landfill.
4. In all of our business activities, we will adhere to environmental laws and regulations, other requirements.
5. By disclosing environmental information, we will place a high value on communication and cooperation with our stakeholders, and contribute to local communities.
6. As a member of society, each and every employee will improve his or her attitude to the environment through environmental education and awareness.

Effective Date : February 28 , 2024
